

## FURTHER READING

We have drawn upon a number of books, articles, news media, and government and NGO reports in preparing this commentary. Our core influences flow from ongoing ecological and socialist movement discussions of eco-socialist issues. Contributions from 350.org, Greenpeace, Extinction Rebellion, the *Guardian* and Green Left Weekly are valuable. Additional ongoing sources include CNN, *The New York Times*, *The Washington Post*, the Australian Broadcasting Corporation and other commercial and public broadcasting outlets. We are also grateful for the continuing contributions to public debate by Bill McKibben, George Monbiot, Naomi Klein, Michael Mann, and other climate activists, scientists and commentators.

Below, we identify some of the key readings which have informed our presentation and arguments throughout the book. We have provided these on a chapter-by-chapter basis. These are indicative rather than comprehensive lists intended for those wishing to engage in further reading on these topics.
