Acceptance and Commitment Therapy, 7
ACORN, 164
  ACORN-generated research, 127
  collaboration, 118, 125–127
  database, 128
  platform, 125
  questionnaires, 126
  system, 170
  Toolkit, 125
Acquisition of skills, 22
Adults, 77
Affirmative psychotherapy, 103
ALERT system, 122
Alliance bond capacity, 139
Alliance process, 149
Alliance rupture–repair, 43–44
  impact of alliance rupture–repair on outcome, 44–45
  impact of alliance rupture–repair training on outcome, 45–46
  responsiveness, 139
American Psychological Association (APA), 6, 16
Anger, 41
Antidepressant medication, 5
Anxiety, 21, 138
Assessment, 21
Attachment style, 92–94
Attitudes, 107

Behavioural healthcare
  ACORN-generated research, 127
  client data better predictor of outcome than clinician, 124–125
  clinical information systems, 121–122
  emerging technologies for delivering behavioural healthcare, 128–129
  measurement 2.0 and ACORN collaboration, 125–127
  measurement and feedback to improve outcomes, 124
  revolution in models of understanding, 119–121
  turn of century Zeitgeist, 119
  variance, 122
Behavioural therapies, 92
Brigham Young University (BYU), 124

Carl Rogers's person-centred therapy (Carl Rogers's PCT), 72
Case conceptualization, 21
Center for Clinical Informatics, 118
Century Zeitgeist, turn of, 119
Change processes, 86
Chemotherapy, 5
Children, 77
Class, 103
Clients, 87–89, 140
  attachment style, 92–94
  impact of client preference on outcomes, 95–96
  client preferences, 94–95
  coping style, 91
  data better predictor of outcome than clinician, 124–125
  feedback, 40
  preferences, 94–95
  psychotherapy outcomes, 148
  reactance level, 89–90
  stages of change, 86–88
Clinical evidence-based tools, 21
Clinical expertise, 21, 162

Clinical information systems, 118, 121–122
Clinical range, 120
Clinical utility, 19
Clinician, client data better predictor of outcome than, 124–125
Cogent rationale for clinical strategies, 23
Cognitive behavioural therapy (CBT), 5
Cognitive practitioners, 64
Cognitive therapies, 92
Collaboration, 40–41, 126
  impact of goal consensus and collaboration on outcomes, 41
Colour-blind attitudes, 107
Common factors
  client/life factors, 31
  common factor models, 29–30
  contextual common factors, 32–33
  impact of contextual common factors, 33–34
  feedback effects, 31
  model/technique general effects, 31–32
  model/technique specific effects, 31
  support for Dodo Verdict, 28–29
  therapeutic alliance, 31
  therapist effects, 32
Conceptual scheme, 54
Congruence, 78
  impact of congruence on outcomes, 78–79
Constructs, 55
Consultation process, 139
Contextual common factors, 32–33
  impact of, 33–34
Contextual model, 32
Continual self-reflection, 22
Cooper Norcross Inventory of Preferences, 162
Coping style, 91
  impact of coping style on outcomes, 91–92
Corporate funding, 121
Counselling, 5, 147
  components, 16
Counter-conditioning process, 87
COVID-19 pandemic, 128
CT management, 66
  impact of CT on outcomes, 67–68
Cultural adaptations, 102
  gender, 103–104
  LGBTQ+, 103
  religion/Spirituality, 102–103
  research, 102
Cultural comfort, 107, 109
Cultural humility, 105, 107–108, 168
Cultural identity, 100
  aspects of, 107
Cultural matching, 95
Cultural opportunity, 107, 109
Cultural responsiveness, 100
Culture, 23
Culture blindness, 107
Curiosity, cultivating attitude of, 153

Deliberate practice (DP), 138–142, 169–173
  comments, 171–173
  using data to support, 151–153
  direct DP efforts, 142
  framework, 173
  individual therapist effects, 137–138
  research, 138
  therapist training, 136–137
Demographics, 95
Depression, 21
Dialectal Behaviour Therapy, 7
Disorders, 28
Diverse methods of Psychotherapy, 28
Diversity, 100, 103
Dodo Bird Verdict, 28
Dodo Verdict, support for, 28–29
Dramatic relief, 87

Effect size, 120
Emotional expression, 62–63
  impact of emotional expression on outcomes, 63–64

Emotional processing, 62
Emotional support, 62
Emotionality, 62
Empathy, 72–73, 139
  impact of empathy on outcomes, 74–75
  five levels of, 74
  levels of, 73–74
Empirically supported treatments, 7–10
  areas of concern and some solutions, 11
  emerging research, 4–5
  road to, 6–7
  specific ingredients, 5–6
Equivalence, 29
Evidence based therapies, 9
Evidence-based guidelines, 16
  best available research evidence, 16–20
  client characteristics, culture, and preferences, 23–24
  clinical expertise, 20–23
  guidelines from APA, 17
  types of research used to establish effectiveness of psychological therapies, 18
Evidence-based medicine, 6–7
Evidence-based practice (EBP), 6 (*see also* Deliberate practice (DP))
  evidence-based guidelines, 16–24
Evidence-based relationships, 109
  factors, 72
  variable, 74
Externalisers, 91
Eye movement and desensitisation reprocessing (EMDR), 29

Family, 77
Feasibility of intervention, 20
Feedback
  data in supervision, 149–150
  effects, 31
  feedback-informed care, 46–47, 110
  feedback/routine monitoring, 31
  to improve outcomes, 124–125
  to improve supervision, 153–154
Feedback-informed treatment (FIT), 46, 124, 170
Food and Drug Administration, 120

Gender, 95, 103–104
Goals consensus, 40–41
  impact of goal consensus and collaboration on outcomes, 41
Group therapy, 77

Healthcare system, 118
Heart bypass surgery, 5
Hierarchical linear modelling, 123
Hostilities, 41
Humility, 108
  cultivating attitude of, 153

Im, 64–65
  impact on outcomes, 65–66
Individual practitioner, 123
Individual therapist effects, 137–138
Information technology
  ACORN-generated research, 127
  client data better predictor of outcome than clinician, 124–125
  clinical information systems, 121–122
  emerging technologies for delivering behavioural healthcare, 128–129
  measurement 2.0 and ACORN collaboration, 125–127
  measurement and feedback to improve outcomes, 124
  revolution in models of understanding, 119–121
  turn of century Zeitgeist, 119
  variance, 122
Internalisers, 91
Interpersonal Expertise, 22
Interpersonal skills, 22
Intersectionality, 104, 107
  clinical example, 105

Introversion–extroversion, 91
Item torture test, 125

Knowledge base for supervisor, 150–151
