

INDEX

- Autonomous technical progress (ATP), 5
- Autoregressive Distributed Lag (ARDL), 55
- Bank efficiency, 18–19
- Bank market risk, 17–18
 - independent variables, 19
 - model, 22–26
- Bank Negara Malaysia (BNM), 26
 - financial inclusion, 15
 - initiatives, 17
- B40 household income, 75
- Breusch-Pagan LM test, 24
- CAMEL rating system, 22
- Capital flight, 31
 - concept, 32–33
 - vs.* human capital, 35–39
- Commodity prices
 - fluctuations, 80
 - instability, 80
- Constant conditional correlation (CCC), 88
- Consumer price index (CPI), 87
- Cost efficiency, 17, 20–21
- Domestic technological progress (DTP), 5
- Dynamic conditional correlation (DCC), 88
- Early Warning System (EWS), 19, 22
- Economic growth, 47–49
- Economic Vulnerability Index (EVI), 72
- Ethnic disparities, 70
- European Patent Office (EPO), 4
- Exchange rate volatility, 52–54, 54–63
- Expected shortfall (ES), 17
- Financial development, 51–52, 54–63
- Financial inclusion, 15
- Financial openness, 71
- Financial Sector Master Plan (FSMP), 17

- Fiscal policy, 71
 - inclusive growth, 96–98
 - income inequality, 96
 - Malaysia, 101
- Fluctuation, 53, 83
- Foreign direct investment (FDI), 36, 38
 - benefits, 45
 - effect, 54–63
 - inequitable development, 49–51
- Foreign technological progress (FTP), 5
- Gamma ratio, 21
- Generalised Autoregressive Conditional Heteroscedasticity (GARCH), 53, 84–87
- Gini coefficient, 47, 48, 69, 96, 98
- Globalization, 2, 46
- Government expenditures, 102
- Gross Domestic Product (GDP), 81, 99, 104, 105
 - Gini coefficient, 48
 - public debt, 102
- Growth expansion, 6
- Growth reduction, 6
- Hausman's specification test, 24
- Human capital, 33–35
- Human Development Index (HDI), 72
- Inclusive growth, 68–69
 - commodity prices, 80
 - components, 79
 - defined, 95
 - fiscal policy, 96–98
 - Malaysia, 69–71, 98–101
 - public spending, 101–104
 - rubber industry, 81–84
- Income gap, 100
- Income inequality, 47–49, 71
 - factors, 96
 - fiscal policy, 96
 - macroeconomic stability and growth, 96
- Independent variables, 19
- Industrial production index (IPI), 88
- Inequality gap, 46
- Inequitable development, 54–63
- Information and communication technology (ICT), 3
- Innovation, 1–11
- Innovation growth effects, 5, 11
- Innovation technical progress (ITP), 6
- Innovative capacity, 3
- Intellectual property rights (IPR)
 - effect of, 5–11
 - sensitivity, 2
 - standards protection, 4

- International Tripartite Rubber Council (ITRC), 90
- Japan Patent Office (JPO), 4
- Locally-initiated innovations, 3
- Logistic regression, 22
- Malaysia Human Capital Index (HCI), 39–40
- Malaysia Human Development Report, 68
- Malaysia Inclusive Growth Index (MIGI), 71–72
- Market expansion effect, 4
- Market power, 4
- Market risk, 16, 19–20
- Maximum likelihood estimators, 21
- Methodology, 5, 84–85
 - Malaysia Inclusive Growth Index (MIGI), 71–72
- Millennium Development Goals (MDGs), 68
- National Economic Advisory Council of Malaysia (NEAC), 67
- Natural rubber, 81, 83, 85
- Natural rubber latex (NR), 83
- Pareto efficiency, 46
- Policy implications, 89–91, 104–106
- Poolability F-Test, 24
- Poverty rate, 100
- Poverty reduction, 70
- Productivity, 2–5
- Public spending, 101–104
- REER volatility, 53, 54
- Reformation, 71
- Research and development (R&D), 2
 - commercialised foreign, 3
 - effects, 3
- Ribbed smoked sheet (RSS), 83
- Rubber industry, 81–84
- Rubber price return, 89
- Smallholders, 82
- Stochastic frontier analysis (SFA), 17, 18
- Technical efficiency change (TEC), 5
- Technically specified rubber (TSR), 83
- Terms-of-trade shock, 80
- Toda-Yamamoto causality test, 87
- Total factor productivity growth (TFPG), 5
 - decomposition, 7–10
- Total factor productivity (TFP) index, 5
- Trade, 2–5, 71
- Trade-related spillovers, 2
- Triadic patent family, 4, 5

- United Nation of Trade and Development (UNCTAD), 55
- United Nations Development Programme (UNDP), 98
- United States of Patent & Trademark Office (USPTO), 4
- University of Texas Inequality Project (UTIP), 55
- Unreported or unrecorded capital outflows, 32
- Value at risk (VaR), 17, 18, 20
- Volatility clustering, 84
- Volatility of natural rubber price, 83
