CONTENTS

<i>List of Figures, Tables and Boxes</i>	<i>ix</i>
<i>About the Author</i>	<i>xi</i>
<i>Acknowledgements</i>	<i>xiii</i>
1. Introduction	1
2. The Big Picture: An Overview of Research Designs	11
3. Data Collection Methods	25
4. Sampling Methods	53
5. Data Analysis Methods	63
6. Presenting and Reporting Qualitative Research	91
7. Qualitative Research Issues	119
8. Summary and Reflections on Overcoming Disciplinary Friction	133
Appendix 1: Sample Answers for the Activities	141
Appendix 2: Antibiotics and Activity Spaces: Project Description	145
Appendix 3: Samples (Editable Files Available Online)	147
Appendix 4: Suggested Reading and Resources	175
<i>References</i>	<i>185</i>
<i>Index</i>	<i>211</i>

LIST OF FIGURES, TABLES AND BOXES

FIGURES

Fig. 1.	Analytical Framework	47
Fig. 2.	Excerpt of a Hierarchically Structured Coding Frame and Associated Examples	70

TABLES

Table 1.	More Credible Interview Research	67
Table 2.	Standard Options to Present Qualitative Research Process and Findings	94
Table 3.	Common Quality Criteria and Examples: Qualitative, Quantitative, and Mixed-method Research	104
Table 4.	Reporting Guidelines for Qualitative Research	106
Table 5.	Dealing with Problems in Interdisciplinary Research	136

BOXES

Box 1.	Interviews: A Notational Remark	26
Box 2.	Etiquette and Behaviour in Interview Research	60
Box 3.	Evolution of Analytical Frameworks through Thematic Analysis in a Research Project	71
Box 4.	A Pre-submission Enquiry	111
Box 5.	Written Outputs of a Mixed-method Project	114

ABOUT THE AUTHOR

Marco J. Haenssger is Assistant Professor in Global Sustainable Development at the University of Warwick. He is an interdisciplinary mixed-method researcher with interests in international development, policy implementation, socio-technological change, and global health, and with experience in evaluation, development finance and economics, and policy advisory. He has received multiple awards for his teaching practice in global health, and his interdisciplinary research has been published in leading international journals such as *World Development*, *Social Science and Medicine*, and *Health Policy and Planning*. He holds degrees in International Development from the University of Oxford and General Management from the European Business School.

ACKNOWLEDGEMENTS

This book arose as a response to research methods training needs in the classroom as well as ‘in the field’, and so I am particularly grateful to Cathia Jenainati, whose support enabled the space for this book to materialise. The content of this book draws on my own interdisciplinary research experiences and training, much of which took place under the patient and encouraging guidance of Proochista Ariana. Other supervisors, mentors, and teachers have left their indirect impact on the positions in this book as well, among whom I would especially like to thank Eva Terberger, Marlis Sieburger, Felix Reed-Tsochas, How Lih Ren, and Thomas Koch. Likewise, without the insight from colleagues, researchers, and research assistants from whose experience and views I could learn, this book would have very little content indeed, and I would like to acknowledge in particular Nutch Charoenboon, Paridhi Jain, Nutan Jain, Li Hong Min, Li Jian, Thippaphone Xayavong, Penporn Warapikuptanun, Kanokporn Wibunjak, Patthanant Thavethanuttanawin, Yuzana Khine Zaw, Mukdawan Sakboon, Prasit Leepreecha, Giacomo Zanello, Caroline Jones, Vicki Marsh, Yoel Lubell, Elizabeth Elliott, Jessica Savage, Jocelyn Watkins, Thomas Althaus, Ivo Vlaev, Marco Liverani, and Clare Chandler.

This work would not have been possible without financial support for qualitative and mixed-method research projects that are featured in this book: ‘Antibiotics and Activity Spaces’

was funded by the Antimicrobial Resistance Cross Council Initiative supported by the seven research councils in partnership with the Department of Health and Department for Environment Food & Rural Affairs (Grant Ref. ES/P00511X/1, administered by the UK Economic and Social Research Council) together with public engagement funding from the University of Warwick's Humanities Research Fund and the Global Research Priority on Connecting Cultures. 'What if precarity causes drug resistance?' was funded by the University of Warwick Institute of Advanced Study and the Global Research Priority on International Development. 'Protected Areas and People: Exploring perceived wisdoms surrounding natural resource management and sustainability' was funded by the University of Warwick Global Challenges Research Fund Catalyst Fund. 'The impact of C-reactive protein testing on antibiotic prescription in febrile patients attending primary care in low-resource settings' was funded by the Foundation for Innovative New Diagnostics, the Wellcome Trust Institutional Strategic Support Fund, and the Wellcome Trust Engaging Science Grant (105032/Z/14/Z).
