

# Index

- Affect–appraisal model
  - appraisal systems, 28–38
  - emotions, 23
  - sensory systems, 24–28
- Affordances, 42–44, 73, 196–197
- AI/machine learning (ML) algorithms, 102
- Altitude marker, 108
- Anticipation, 41
- Application-enabling technologies, 112
- Area shift, 108
- Artificial intelligence (AI), 2, 79, 228–244
- Augmented reality (AR), 1, 2, 39
  - application-enabling technologies, 112
  - applications, 102–103
  - CIMS, 97
  - customer decision process, 117
  - energy, 127
  - forecasting, 98–99
  - gaming, 127
  - GoldRun, 97
  - healthcare, 126
  - history, 99–102
  - IKEA, 103–104
  - manufacturing, 125–126
  - marketing management, 115
  - marketing managers, 104–105
  - marketing products, 124–125
  - mobile technology, 103
  - persuasive technologies, 129–133
  - pervasive technologies, 129–133
  - publishing technologies, 112
  - Snapchat, 103
  - types, 105
  - Vespa’s scooter Ad, 104
- Augmented virtuality (AV), 2
- Automaticity, 178–182
- Blended environment (BE) app, 148–149
- Branding, 123–124
- Bruno’s taxonomy, 56–57
- Capabilities, 41
- Capacities, 41
- Charms, 51, 71–73
  - imaginary, 37
  - innovative, 37
  - invented, 37
  - original, 37
  - prospective, 37
- Collaborative augmented reality, 114–115
- Computational process flow, 70–71
- Consumer choice, 199–200
- Consumption behavior, 199–200
- Coupon promotions, 120–121
- Creativity, 35–37
- Customer decision process, 117
- Customer environments, 38–40
- Customer information processing, 17–45
- Customer interaction process, 7–12
- Customer interface and monitoring setup (CIMS), 5, 8
- Customer model, 40–44
- Customer process, 10–12
- Customer technology environments (CTEs), 1, 50
  - abstraction, 5
  - customer information processing, 17–45
  - decision-making, 17–45
- Customization, 123

- Decision-making, 17–45
- Diffusion, 201
- Digital entity, 141
- Edge computing, 225–228
- Embedded positioning, 122
- Emotions, 23
- Enabling technologies
  - artificial intelligence, 228–244
  - Customer Technology Environments (CTEs), 214–216
  - edge computing, 225–228
  - machine learning, 228–244
  - service-oriented computing, 223–225
- Energy, 127
- Enhanced environment (EE) app, 147–148
- Environmental monitoring setup (EMS), 8
- Equivalence, 66
- Exosenses, 25–28
- ExoSight, 26
- Expectations, 30
- Fidelity, 84
- Focal relationship manager, 10
- Forcing, 63–64
- Forecasting, 98–99
- Freedom, 85
- Gaming, 127
- Giraffe 360, 80
- Global positioning system (GPS), 113
- GoldRun, 97
- Grid marker, 108
- 5G technologies, 216–221
  - America, 221
  - Asia, 221–223
- Healthcare, 126
- HoloHuman, 152
- HoloPatient, 152
- Homo prospectus, 18
- Hosting, 85, 117–118
- Hub devices, 170–171
- IEEE Pervasive Computing, 105
- Illusions
  - natural, 63
  - physical, 63
  - sensory, 60–63
- Imaginary charm, 37, 51
- Imagination, 36
- Immersiveness, 84
- Information presentation, 108
- Innovation, 36
- Innovative charm, 37, 51
- In situ product imagination, 120
- In situ product viewing, 120
- Internet of Everything (IoE)
  - automaticity, 178–182
  - consumer choice, 199–200
  - consumption behavior, 199–200
  - customer value, 182
  - definition, 168
  - description, 168
  - diffusion, 201
  - dimensions, 175–176
  - examples, 164–167
  - framework, 184–185
  - gateways, 171
  - guiding axioms and norms, 198–199
  - Hub devices, 170–171
  - importance, 161–164
  - learning, 178–182
  - machines, 182
  - marketing perspectives, 174–175
  - marketing processes, 197–198
  - network, 183–184
  - object, 183
  - platform policy, 200
  - platforms and cloud, 171–174
  - pricing, 200–201
  - product policy, 200
  - research agenda, 199
  - seamlessness, 176–177
  - sensors, 170–171

- STAL dimensions, 185–188
  - technology stacks, 168–170
  - timelessness, 177–178
- Intuition, 20–21
- Invented charm, 37, 51
- Knowledge, 84
- Knowledge management, 9, 121–122
- Learning, 19, 41–42
- LEGO Nexo Knights, 123
- Light sensing, 26
- Long-term memory (LTM), 33, 34
- Lowe's, 80
- Machine learning, 228–244
- Magic
  - AFFECT, 68–69
  - computational process flow, 70–71
  - descriptions, 51
  - effects, 64–68
  - methods, 54–55
  - perceptual mechanisms, 55–64
- Magnetoreception, 27–28
- Marker-based augmented reality, 105–108
- Markerless augmented reality, 108
- Market impact forecast, 145–146
- Marketing management, 5–7
  - after purchase/maintenance, 122
  - coupon promotions, 120–121
  - embedded positioning, 122
  - examples, 117
  - hosting, 117–118
  - knowledge management, 121–122
  - on-pack promotions, 120
  - problem solver, 121–122
  - product demonstrations, 119
  - product trial, 122
  - promotion, 118
  - sales force support, 119, 120
  - in situ product imagination, 120
  - in situ product viewing, 120
  - special event promotions, 121
- Marketing managers task, 249–250
- Marriott Hotels, 80
- Massive machine to machine (mM2M), 1, 2
- Massive reuse model, 22
- Memory, 19, 33–34
- Mental forcing, 63
- Mental simulations, 41
- Mirror neurons, 33
- Mixed reality (MR), 1, 2–4, 39
  - applications, 146–147
  - augmented reality, 142–144
  - blended environment (BE) app, 147–148
    - classification, 150
    - definition, 147
    - digital entity, 141
    - enhanced environment (EE) app, 147–148
    - examples, 143
    - key players, 146
    - market impact forecast, 145–146
    - marketing, 152–154
    - SF classes, 151–153
    - TF classes, 147
    - VF classes, 150–151
    - virtual entity, 141
    - virtual reality, 143–145
- Mobile technology, 103
- Motivation, 41
- Natural illusions, 63
- Naturalness, 54
- Negotiator, 9
- Normal reality, 38
- Novelty, 34–35, 51
- On-pack promotions, 120
- Original charm, 37, 51
- Originality, 36
- Perception, 19
- Perceptual mechanisms
  - forcing, 63–64

- illusions, 60–63
  - misdirections, 56–60
- Persuasive technologies, 129–133
- Pervasive technologies, 129–133
- ‘Phantom vanish,’ 68
- Physical forcing, 63
- Physical illusions, 63
- Place illusion (PI), 84
- Plausibility illusion (Psi), 84
- Pointer, 108
- Presence, 84
- Problem solver, 9–10
- Product demonstrations, 119
- Product policy, 200
- Product trial, 123
- Projection-based augmented reality, 108
- Prospection, 36
- Prospection model, 18–22
- Prospective charm, 37, 51
- Prospective motivation, 19
- Publishing technologies, 112
  
- Repeatability, 85
- Research agenda, 199
- Return on assets (ROA), 6
- Return on investment (ROI), 6
- Rotation marker, 108
- Rover’s path, 108
  
- Sales force support, 119, 120
- Salience forcing, 63
- Seamlessness, 176–177
- Sensors, 170–171
- Sensory illusions, 60–63
- Sensory systems
  - exosenses, 25–28
  - olfaction, 24
  - taste/gustatory, 24
  - trigeminal-chemosensory system, 24
- Service-oriented computing, 2,  
223–225
- Sharpe’s taxonomy, 57
- Short-term memory (STM), 33
- Six degrees of freedom (6DoF), 113
- Snapchat, 103
- Social functionality (SF) classes,  
147
- Spatial Audio, 145
- Stable occlusion, 66
- Structuration theory, 190–196
- Substitutable elements, 66
- Superposition-based augmented  
reality, 109–111
  
- Technology functionality (TF) classes,  
147
- Time, 42
- Timelessness, 177–178
  
- Value functionality (VF) classes, 147
- Vespa’s scooter Ad, 104
- Virtual Body (VB), 84
- Virtual entity, 141
- Virtuality continuum, 2, 3
- Virtuality spectrum, 3
- Virtual reality (VR), 1, 2, 38, 39
  - applications, 79–80
  - components, 89
  - definitions, 82–83
  - dimensions, 83–86
  - experiences, 89–92
  - impact forecast, 80–81
  - marketing management, 86–88
