
Retraction notice: Enhancing sustainable supply chain performance by adopting sustainable lean six sigma-Industry 4.0 practices

The publisher of *Management of Environmental Quality* wishes to retract the article by Jaypalsinh Ambalal Rana and Suketu Y. Jani “Enhancing sustainable supply chain performance by adopting sustainable lean six sigma-Industry 4.0 practices”, published in *Management of Environmental Quality*, Vol. 34 No. 4, pp. 1198-1221, <https://doi.org/10.1108/MEQ-04-2022-0122>. It has come to our attention that a large portion of this article is taken, without attribution, from an earlier, unpublished original work by Manoj Palsodkar, Madhukar Nagare, and Gunjan Yadav, “Improving sustainable supply chain performance through integrated Agile New Product Development-Industry 4.0 practices: Recovering from COVID19 impacts”. The submission guidelines for *Management of Environmental Quality* make it clear that articles must be original. The authors would like it to be noted that they are not in agreement with this retraction. The publisher of the journal sincerely apologizes to the readers.
