

INDEX

- A Primer on Partial Squares Structural Equation Modeling (PLS-SEM)*, 13
- Academy of Management Review (AMR), 22–23
- Academy of Marketing Science Review (AMSR), 22–23
- Agencement, 127
- Alliance, 74
- Archival photographs, 42
- Asphalting journals (A-journals), 28
- “*Aspirant Journals* [P A], 3–4
- Asymmetry, 75
- Atlas. ti, 134–135, 138, 149
- Australian Business Deans Council (ABDC), 2–3
- Autodriving, 41

- Bloomberg Supply Chain Analysis (Bloomberg SPLC), 74–75, 79, 81–83
 - for Apple [APPL] quantified suppliers, 79
 - variables available in, 80
 - contents and extracting information, 83–85
 - pairing with other data sources, 85–86
 - theoretical questions potentially answered using, 87
- Bloomberg’s Supply Chain Algorithm (BSCA), 82
- Buyer–supplier agreements, 73–74

- Capital Expenditure (CAPEX), 81–82
- Career
 - advice for managing career, 20–21
 - changing universities, new challenges, 23–24
 - managing publishing career, 15–17
 - managing teaching career, 17–20
 - quantitative and qualitative methods, 22–23
 - unfolding, 27–30
- Cloud-based integration, 142
- Coding
 - correlations, 106–107
 - process, 145
- Compassion
 - extending photographic methods beyond organizational compassion, 67–68
 - in organizational research, 58–59
 - participant photograph study of compassion, 64
 - researcher photograph study of, 62–64
 - risks and caveats of compassion research, 67
 - studying compassion through photos, 62–66
- Compustat, 74–75
- Computer-aided/assisted qualitative data analysis software (CAQDAS), 133–135
 - packages, 135–143
 - programs, 136
 - articles reviewing CAQDAS use, 139–140
 - coverage in FT50, 141
 - in practice, 143–148
 - exploration, 146
 - getting started with CAQDAS, 148–149
- Confessional, 27
- Contemporary meta-analytic techniques, 104
- Contingency, 35–38
- Contribution, 28–29

- Cost of goods sold (COGS), 81–82
- Criticism of business education, 14
- Cross-sector partnerships, 73–74
- Culture, 26
- Curvilinear meta-analyses, 102–103
 - challenges with and opportunities created by implementing approach, 108–110
 - coding correlations, 106–107
 - creating meta-analytic correlation matrices, 107–108
 - future research opportunities, 108–110
 - guide for conducting, 101–108
 - literature search, 106
 - meta-analytic techniques, 103–104
 - recommendations for conducting, 105
 - traditional techniques for examining curvilinear relationships, 104
 - transforming correlations, 107
- Customer experiences, 19–20
- Data, 31
 - management, 144–145
 - preparation, 149
- Dedoose, 142
- Dependent variable (DV), 106–107
- Diagrams, 147
- Discriminant validity, 18–19
- Efficiency, 75
- Emotions projected to photographs, 46–47
- Epistemological hypochondria, 34–35
- Erasmus Research Institute of Management (ERIM), 3
- Ethnography, 26
 - career unfolding, 27–30
 - as social practice, 30–35
 - on chance and contingency, 35–38
- Excel, 142
