

INDEX

- A-Friend-of-Xitou Cardholders, 102
- Acceleration, 179, 180
- Accidental culinary tourists, 8
- Activity involvement, 44
- Aesthetic(s), 173–174
 - enjoyment of city, 174
 - ethicist, 178
 - sense of world, 174
 - Søren Kierkegaard's concept of, 175–176
- Aestheticization of economy, 174–175
- Affective commitment, 134, 135
- Agriculture, 163
- Amenities, 47
- AMOS, 122
 - output after model modified, 124
- Analysis of variance (ANOVA), 10–11
- Apathetic attendees, 7–8
- Apathetic attendees, 8
- Arcades Project, The* (Benjamin), 175
- Assurance, LODGSERV measure, 60
- Attitude association, 116
- Attraction, 42
- Attribute association, 116
- Australian T QUAL accreditation system, 27
- Average monthly rainfall, 97, 98
- Average monthly temperature, 96–97
- Average of variance extracted (AVE), 49, 65, 139–140, 154

- Band, 47
- Begriffsgeschichte* (history of concepts), 179
- Benefits association, 116
- Bootstrap *t*-statistics test, 140

- Brand association, 114, 115, 118, 123
 - impact of consumer value
 - co-creation on, 127
 - facets, 116
- Brand awareness, 114
- Brand connotation, 114
- Brand equity, 113–115
 - model of impact of value creation on, 117
- Brand intentionality, 115, 116
- Brand knowledge, 113
- Brand loyalty, 114, 115, 116, 118
 - impact of consumer value
 - co-creation on, 127–128
- Brand reliability, 115, 116
- Brand strength, 114
- Brand trust, 115, 116
 - impact of consumer co-creation of value on, 125–126
- Brand value, 114

- Capitalism, 180
- Capitalistic market system, 180
- CEDES taxonomy, 18–19
- Centrality to lifestyle, 42
- Chiayi City International Band Festival (CIBF), 44

- China
 - continuity, 82
 - cruise ports in, 82
 - policy, 84
 - significance of location, 82, 83
- China Cruise and Yacht Industry Association (CCYIA), 82
- Chinese market, 76
- Clean India Mission, 166
- Climate, 179
- Cloud model, 80

- CMIN, 122, 123
- Co-creation (*see also* Value co-creation)
- data analysis, 47
 - data collection, 47, 48
 - hypothesis testing, 49–52
 - as mediator, 51
 - methodology, 44
 - practical implications, 52–53
 - purpose of study, 42–44
 - questionnaire design, 44–47
 - research framework and hypotheses testing, 44
 - sample characteristics, 48–49
 - theoretical implications, 53–54
- Cognition, 135
- Cohen's f^2 effect size, 140
- Commitment, 134
- in market orientation practices, 144
- Common-method variance (CMV), 139
- Community-based tourism, 164
- Comparative fit index (CFI), 122
- Competitiveness analysis
- cloud model, 80
 - cruise port evaluation indicators, 80–82
 - cruise ports in China, 82–84
 - of cruise ports in eight Chinese cities, 88
 - cruise tourism industry scale, 85
 - development of cruise ports, 78–79
 - economic impact of cruise tourism, 77
 - entropy and expected values, 87–88
 - environmental issues concerning cruise ports, 79
 - expert's questionnaire collection, 84–85
 - experts' assessment of Sanya as cruise port, 86
 - passengers' satisfaction of cruise ports, 77–78
 - purpose of study, 76–77
 - residents' perceptions, 79–80
 - Sanya cruise port's numerical evaluation, 86
- Composite reliability (CR), 49
- Compound Annual Growth Rate (CAGR), 80
- Compulsory national quality tourism scheme, 28
- Conceptual model, 136
- Confirmatory factor analysis (CFA), 47, 49–50, 153–154
- Connotation of brand association, 116
- Conservationists, 16
- Consumer
- experience, 114
 - measurement, 114
 - protection scheme, 24
- Consumer-based brand equity model (CBBE model), 113
- Consumer-based concept model, 114
- Continuance commitment, 134–135
- Convenience sampling techniques, 62–63
- Corporate social responsibility (CSR), 162–163
- expenditure range in Section, 135, 165–166
 - in India, 164–165
